

About Us:- Pranav Vikas Ltd. (Vikas Group) has expanded its thermal management capabilities to adjacencies, becoming the first company in India to locally develop a Battery cooling system for Electric Bus. Other products being developed for E Mobility include Electric HVAC systems, Motor cooling systems & Power electronics cooling systems. Extruded Aluminum profiles is yet another area of expansion, becoming the first company in India to produce Micro channel tubes for heat exchangers and also extruded profiles for Electric Vehicle applications. As part of its Defense business, it also supplies Auxiliary Power Units and Crew Cooling systems for tanks.
