

**Job Title:** Service Engineer (Electrical) – Domestic Appliances & Pumps

**Location:** Field-based (Daily travel up to 40–50 km within the local area)

**Job Type:** Full-Time

---

**Job Summary:**

We are looking for a dedicated and technically skilled **Service Engineer (Electrical)** to handle repairs and service of domestic electrical appliances, water pumps, and starter panels. The ideal candidate should have at least 1 year of relevant experience, and the ability to diagnose and resolve electrical issues efficiently at customer locations.

---

**Key Responsibilities:**

- Attend service calls for repair and maintenance of **domestic electrical appliances, water pumps, and starter control panels.**
- Diagnose faults and perform necessary repairs or component replacements on-site.
- Maintain proper communication with customers regarding the problem, service actions taken, and follow-up if required.
- Accurately document service reports and maintain records.
- Coordinate with the service coordinator for scheduling and customer feedback.
- Travel locally within a 40–50 km radius daily for field visits.

---

**Required Qualifications:**

- **Minimum 1 year** of hands-on experience in electrical service or repairs, especially in domestic applications and pumps.
- Educational qualification: **ITI / Diploma in Electrical** from a recognized institute **or** trained under **NSDC in Electrical Home Wiring.**
- Practical knowledge of **pump repair and troubleshooting** is a strong advantage.

---

**Skills & Competencies:**

- Sound knowledge of electrical wiring, troubleshooting, and basic panel systems.
